

COVID-19 Vaccines Protect People with Disabilities.

COVID-19 Vaccines are Important: People with disabilities are at risk for COVID-19. Many live in group homes or cannot wear masks and social distance.

COVID-19 vaccines are safe: They have been given to millions of people around the world. Many tests show that the vaccines are safe.

COVID-19 vaccines are useful: The vaccines help prevent serious COVID-19 symptoms, time spent in the hospital, and even death.

COVID-19 vaccines are available: You can receive your vaccines at hospitals, clinics, and pharmacies. There are several choices for vaccines.
