Food Allergy Policy

Reason this policy is important: Food allergies are becoming more common among infants and young children. Allergic reactions can range from mild skin rashes to severe, life-threatening reactions with breathing difficulties. It is important to reduce the likelihood that these reactions will take place while the child is at child care.

Procedure and Practices, including responsible person(s):
When children with food allergies attend the child care setting:

______________________________(staff title/name) will provide the family with the Food Allergy Action
Plan* to be filled out by the child’s health care provider. This action plan must be filled out and
returned to __________________________________________________________________________ (staff title/name) before child begins program.

- Based on the child’s Food Allergy Action Plan, caregivers will receive training and put into practice:
  - Preventing exposure to specific food(s) that trigger allergy
  - Recognize symptoms of allergic reaction
  - Treating allergic reaction

- Parents and staff shall arrange for setting to have appropriate medication (if necessary) on site, proper
  storage of medication, equipment and training to use while in child care.

______________________________ (staff title/name) will promptly take proper steps outlined in Action Plan if a
reaction occurs in child care.

______________________________ (staff title/name) will notify emergency medical personal if epinephrine has
been given.

______________________________ (staff title/name) will notify parents of any allergic reaction or possible
contact with food that may cause an allergic reaction.

- Individual child’s food allergies will be posted prominently in classroom and/or wherever food is
  prepared (care will be given to confidentiality issues).
- Action Plan and medication will be taken on field trips, including playground or walks,
  by ____________________________________________ (staff title/name)

When the policy applies: For all children with food allergies.

Communication plan for staff and parents:
Staff and volunteers will receive a written copy of this policy in their orientation packets before beginning work
at the child care.

______________________________ (staff title/name) will share Food Allergy Action Plan with caregivers and
provide training (if necessary).

Food allergies are posted in classroom and food preparation areas. Confidentiality of the child’s allergy shall be
assured.
