### Outcome: We will meet the target for child outcomes

| So that: children will gain the knowledge and skills and the appropriate behavioral skills to interact successfully with their family, peers and community members in a variety of natural routines and settings. |

#### Strategy update from last quarter:

Cluster C has not met the target for child outcomes. Cluster C will continue to implement the strategies that we wrote for the 1st Quarter QIP.

#### Explanation of Data:

**Quarterly Data:** Out of Compliance

- SS1 Social Emotional (51.4%/55%)
- SS1 Knowledge & Skills (33.1%/55%)
- SS1 Appropriate Behavior (44.2%/55%)

Cluster C did not meet the target for child outcomes. There are some concerns about how the data is being collected. Some providers may not have as much experience in AEPS scoring; therefore, the scores may not reflect the progress accurately.

#### Strategies (Who is responsible/timeline/evaluation):

- During the LPCC Oversight Meeting on March 17, 2015, LPCC Coordinator and SPOE Director worked together to encourage our agencies to expand their provider’s knowledge on AEPS scoring through training. Cluster C also shared the link at our Agency Meeting for a webinar for the Child Outcomes Skill Inventory Exit Form for provider training purposes. We will revisit this topic at our September LPCC Oversight Committee Meeting to determine the number of agencies that have completed this training.

- Upcoming Team Meeting: July 16, 2015 - We will talk to our coordinators about emphasizing to our families the importance of family participation and active involvement in their child’s services. We hope that this will help to improve child outcomes. We will also be doing training on completing and understanding the Exit Survey so the coordinators can answer any questions the family may have regarding the survey.

- Evaluation: LPCC will continue to monitor Child Outcome data as it becomes available to determine if there is any improvement in growth as we implement these strategies.
List barriers to accomplishing strategies and how to address them:

- Family participation: Cluster C provides services to a large population of low-income families. This may affect the family participation and implementation of strategies given by the providers to complete during the week. Service coordinators will continue to emphasize the importance of follow up activities and family participation.
- Cluster C believes that the providers haven’t taken advantage of the AEPS training as they should. Cluster C will re-visit the importance of this training at the September LPCC Oversight Committee Meeting and see how the trainings have been going.

Resources needed:

- ☐ State Clarification
- ☐ IIDC
- ☐ Training
- ☐ Mentoring
- X Other: __Internal Training____

Explain:
Cluster C will need updates on training opportunities, etc. in AEPS.

Stakeholder Collaboration:
During our Oversight and Agency Meetings in September 2015, we will re-visit the need for the providers to record accurate exit scores and importance of obtaining these scores so that we will have a good reflection of the child’s progress made during the time they received First Steps services.
