IRCA Training and Consultation Options 2015-2016

Customize options based on your needs and resources...

In a time of limited resources and increased expectations, we understand that you need to be able to customize a range of services to meet your specific needs. The ultimate goal is to work in collaboration with schools and/or districts to create sustainable and positive change through a combination of coaching, training, and consultation strategies. Regardless of the option chosen, schools/districts receive support in implementing evidence-based practices (EBP) or strategies which focus on student outcomes. These options integrate well with other school-based initiatives, such as Response to Intervention (RTI) and School-wide Positive Behavior Support (PBIS).

High Intensity Evidence-Based Practice Project
- For this level of service, an IRCA staff person will be assigned to come to your district for 9 days during the school year, following a phone consult to prepare.
- You will identify a team leader (typically an autism consultant) who is able to be present during the visits to work with an IRCA staff member on activities of the project.
- You will also select a team (or to utilize an existing autism team) for training and implementation of practices within your school or district.
- The autism consultant and team will be trained in implementing evidence-based practices that can be universally implemented.
- Administrative involvement is critical in facilitating change.
- Cost: $10,000 fee for a new school or $7,500 for consecutive years.

Medium Intensity Evidence-Based Practice Project
- For this level of service, an IRCA staff person will be assigned to come to your district for 5 days during the school year, following a phone consult to prepare.
- Identification of a team leader and team same as above.
- Cost: $5,000 fee for a new school or $3,750 for consecutive years.

Low Intensity Evidence-Based Practice Project
- For this level of service, an IRCA Staff Person will be assigned to come to your district for 3 days during the school year, following a phone consult to prepare.
- The team leader and team would be introduced to evidence-based practices with focus on one or two specific EBPs during training sessions.
- Cost: $3,000 fee for a new school or $2,250 for consecutive years.

One Day Evidence-Based Practice Training:

APERS Assessment using Autism Program Environmental Rating Scale
- Assess strengths and challenges within your school environment, with a report detailing recommendations for which evidence-based strategies should be prioritized.
- Training with autism consultant in how to use the APERS so that they can then apply this tool to other classrooms.
- Cost: $1,200 per day of training
