When People are Sick

Most of the time people feel good and can play and work and do what they like to do.

Sometimes people feel sick or bad. Sometimes people need to see the doctor to feel better.

The doctor will tell people what they need to do to feel better. They may need to take medicine or have a surgery to feel better.

People who are sick may need to rest or sleep. They may have to go to the hospital to get better.

It is good to remember that when people feel sick, they may need more help doing things at home. They may also need more quiet to rest. It is a good idea to try to be nice and to try to help.

Sometimes friends and family will also help with work and chores when someone is sick. It is a good idea to be nice and listen to friends and family that help out.

It will be okay. Most of the time people will get better with time, rest, and the doctor's help.
