

Primary Setting for 18 to 29-Year-Olds Over 5 Years

Figure 3 below shows the 18-29-years age group (3,046 individuals) and primary settings for the past 5 years. Considering the impact of COVID-19, the data shows a steady increase in ATE (29% to 36%); a steady decrease in sheltered employment (15% to 13%); and, where individual jobs remained fairly stable the last few years at 32%.
